5-RG

- The 5-RG Safety Helmet offers optimal protection against falling objects like stones, roofing tiles, and bricks, as well as electrical discharges up to 1000V AC and 1500V DC. Perfect for industrial environments, it ensures safety from impact and electrical hazards.

The 5-RG Safety Helmet combines durability, electrical protection, and comfort, making it ideal for demanding industrial work environments.
- Sizes: 54-61 cm
- **Electrical Insulation:** Protects against the passage of electric current caused by physical contact with conductive elements, providing protection up to 1000V AC and 1500V DC (low voltage).
- **Durable Shell:** Constructed from high-density injected polyethylene, with reinforced twin and triangular ribs for added rigidity and impact resistance. Features a visor and water rim for extra protection.
- **Visor & Water Rim:** A visor is integrated into the front of the helmet, offering extra protection, while the water rim around the perimeter ensures safety from water or liquids in adverse working conditions.
- **Comfortable Harness:** Equipped with a head strap covered in fabric sweat band, neck strap, and six buffering straps. Height is adjustable in three positions, with perimeter adjustment via a toothed wheel.
- **Temperature Range:** Functional in environments ranging from -10°C to +50°C.

- CE Certified
- EN 397: 2012 + A1: 2012 (industrial safety helmets)
- EN 50365:2002 (electrically insulating helmets)
- Regulation (EU) 2016/425
