

JŪRAS UN DARBA APĢĒRBS ► BRILLES

SAFETY GLASSES 590-A

Produkta kods: 590-A

- The 590-A yellow goggles are designed to provide effective protection against high-speed, low-energy particle impacts. They can withstand small projected particles, such as wood, metal, or plastic chips, filings, and plant debris produced by gardening machinery, with particle speeds not exceeding 45 m/s. The goggles' design minimizes lateral vision restrictions, and their optical neutrality and lightweight construction ensure long-lasting comfort. The yellow lenses are ideal for tasks requiring better contrast, such as precision work or in low-light environments.

The front features a yellow polycarbonate eyepiece with a fixed-width bridge and integrated nose pads. The spatula-style temples are also made of yellow polycarbonate.

- Scratch resistant polycarbonate for increased durability
- Protection against hazard of impact from high-speed and low energy particles
- Available in 3 different lens colors
- Spatula type temples
- Ergonomic design
- Lightweight frame

- CE and UKCA Certification
- EN 166:2001 (personal eye protection)
- EN 170:2002 (UV filters)
- Regulation (EU) 2016/425
