

## JŪRAS UN DARBA APĢĒRBS ► ЗАЩИТА ДЛЯ СВАРЩИКОВ

### WELDING SHIELD 415-A

Produkta kods: WP415A

- The 415-A Welding Face Shield is designed to offer effective protection against radiation emitted during welding processes and from incandescent particles. This shield consists of a high-density polyethylene helmet and a fiberglass welding face shield, providing full-face protection against heat and burns.
- The 415-A welding face shield offers reliable protection and comfort, making it an ideal choice for professional welders in various welding and cutting applications.
- **Helmet Construction:** Injection-molded from high-density polyethylene with reinforced ribs for added rigidity. Features a smooth surface and a central visor with a water-collecting rim around the perimeter.
- **Welding Face Shield:** Made of polyamide with fiberglass, offering excellent resistance to combustion. The shield is designed to fully cover the face to protect against burns.
- **Adjustable Harness:** Includes a headband, nape band, and a six-point inner harness for optimal comfort and fit. The height can be adjusted in three different positions, and the nape band features a polyamide adjustment wheel.
- **Inactinic Filter:** Comes with a rectangular cavity for the inactinic filter, available in sizes 110×55, 105×50, and 108×51 mm, with a tone 12 filter as standard.
- **Protective Cover:** A 1mm thick colorless polycarbonate cover protects the inactinic filter from impacts and projections.

#### Specifications:

- Filter Sizes: 110×55, 105×50, 108×51 mm
- Weight: 762 g

- CE Certified
- EN 397
- EN 169
- EN 175
- EN 50365
