## WELDING SHIELD WITH AUTO DARKENING VISOR 420

Produkta kods: WP420

- The 420 Welding Face Shield is designed for use across all welding processes starting from 5A, including MIG/MAG, TIG/WIG, plasma-jet cutting, and welding. It is particularly suited for TIG welding, equipped with a special detector for this type of welding. The face shield ensures optimal eye protection and comfort during extended welding operations.
- This face shield offers exceptional protection, comfort, and visibility for professional welders, ensuring safe and efficient work in various welding environments.
- **True Color LCD Technology:** Offers a high optical quality filter (1/1/1/2), providing a true view of the welding area and eliminating the green hue seen in conventional LCDs.
- **Large Viewing Area:** 96×39 mm for a wider and clearer view of the work area.
- **Dual Arc Sensors:** Two sensors detect arcs for automatic darkening.
- **Adjustable Settings:** Includes sensitivity and delay controls for better control over the transition from dark to clear states.
- **Solar-Powered:** Powered by solar cells with a backup lithium battery, providing over 5000 hours of usage (approximately 3 years).
- **UV/IR Protection:** Offers full protection up to shade 13, safeguarding the eyes from harmful UV and infrared radiation.

### Specifications:

- Filter Size: 110 x 90 x 9 mm
- Weight: 452 g

### Additional Features:

- Grinding Mode: Includes a feature for grinding with the same face shield.
- No Battery Replacement: The long-lasting battery is rechargeable via solar power.

- CE Certified
- EN 166
- EN 175
- EN 379
