WELDING SHIELD WITH AUTO DARKENING VISOR 421

Produkta kods: WP421

- The 421 Welding Face Shield is designed for use in various welding processes such as MIG/MAG, TIG/WIG, and plasma cutting, offering reliable protection from UV and infrared radiation. It is particularly suitable for TIG welding due to its special detector for this type of welding. The shield provides optimal eye protection and comfort with a wide viewing area and high optical quality.
- This welding face shield ensures high-quality protection and comfort for professional welders across a variety of applications.
- **True Color LCD Technology:** Offers a high optical quality filter (1/1/1/2), ensuring accurate color representation and a true view of the welding area.
- **Large Viewing Area:** 100×52 mm for better visibility and a clearer work environment.
- **Four Arc Sensors:** Provide automatic darkening for enhanced safety.
- **Adjustable Shades:** The filter has selectable shade ranges of 5-8 and 9-13 for various welding techniques.
- **Grinding and Welding Modes:** A switch allows easy transition between grinding and welding modes.
- **Sensitivity Adjustment:** Adjust the arc sensitivity for optimal performance.
- **Solar-Powered & Replaceable Battery:** Features solar cells with a replaceable CR 2023 battery, offering up to 5000 hours of use.
- **UV/IR Protection:** Offers full protection up to shade 13, safeguarding eyes from harmful radiation.

Specifications:

- Filter Size: 110 x 90 x 9 mm
- Response Time: 0.0004 s
- Clearing Time: 0.1 – 1 s
- Weight: 425 g

- CE Certified
- EN 166
- EN 175
- EN 379
