DYNAMIC ROPE – 9.9 MM

Produkta kods: RD9-9

- The Dynamic Rope is designed for marine and offshore professionals requiring reliable fall protection in activities involving dynamic movements. Its kernmantle construction ensures optimal energy absorption, reducing impact forces during falls, making it suitable for tasks such as maintenance, inspections, and rigging in challenging maritime environments.

Key Features:

- **Material:** High-strength polyamide for durability and resistance to environmental factors.
- **Diameter:** 9.9 mm, balancing strength and flexibility for various applications.
- **Dynamic Elongation:** 32%, effectively absorbing energy during falls to minimize impact forces.
- **Impact Force:** 840 daN, ensuring reduced stress on the user and anchoring system.
- **Length:** Available upon request to suit specific operational requirements.
- **Finishes:** Options include sewn loops for anchoring, terminal knots, or cut ends, providing versatility in application.

Technical Specifications:

- **Construction:** Kernmantle (core and sheath) design for enhanced strength and flexibility.
- **Minimum Breaking Load:** 3,000 kg, ensuring reliability under load.
- **Useful Life:** 15 years from manufacturing date, subject to regular inspections and proper maintenance.

- CE Certified
- EN 892 / UIAA101
