FALL ARREST DEVICE OTTO

Produkta kods: FADO

- The OTTO Sliding Fall Arrest Device is engineered for marine and offshore professionals requiring reliable vertical fall protection. Designed for use with 11 mm diameter semi-static ropes (EN 1891 Type A), this device offers durability and performance in challenging maritime environments.

- **Key Features:**

- **Material:** Constructed from high-strength aluminum, providing excellent resistance to corrosion and environmental factors.
- **Breaking Load:** Rated at 1,500 kg, offering robust performance under load conditions.
- **Automatic Locking:** In the event of a fall, the device locks automatically, minimizing the risk of injury.
- **Design:** Removable and easy to install, the device follows the user's movements along the rope and locks automatically in the event of a fall.
- **Application:** Ideal for vertical applications in marine and offshore settings, including maintenance, inspections, and rigging tasks.

Technical Specifications:

- Material: Aluminum
- Breaking Load: 1,500 kg
- Weight: Approximately 0.485 kg
- Rope Compatibility: Designed for use with 11 mm diameter semi-static ropes (EN 1891 Type A)

- CE Certified
- Conforms to EU Regulation 2016/425
- Standard: EN 353-2:2002
