SEMI-STATIC ROPE – CLASS A

Produkta kods: RSS

- The Semi-Static Rope is engineered for marine and offshore professionals requiring reliable and durable rope solutions for work at height, positioning, and rescue operations. Constructed from high-strength polyamide, this rope offers low elongation and excellent resistance to abrasion, making it ideal for challenging maritime environments.

Key Features:

- **Material:** High-strength polyamide for durability and resistance to environmental factors.
- **Finishes:** Available with sewn loops for anchoring, terminal knots, or cut ends to suit various applications.
- **Class A:** Designed for general use in rope access, rescue, and work positioning.

Technical Specifications:

- Diameter: 11 mm
- Construction: Kernmantle (core and sheath) design for enhanced strength and flexibility
- Minimum Breaking Load: 3,000 kg
- Available Lengths: upon request
- Useful Life: 15 years from manufacturing date, subject to regular inspections and proper maintenance.

- CE Certified
- EN 1891
