WELDING SHIELD 415

Produkta kods: WP415

- The 415 Welding Face Shield provides excellent protection against harmful radiation and incandescent particles during welding processes. It is designed to ensure safety and comfort for welders, with a fully adjustable harness and a high-quality, fire-resistant welding shield. The mask provides full coverage of the face to prevent burns and other hazards.
- This welding face shield ensures superior protection and comfort, making it an essential tool for professional welders working in demanding environments.

- **Helmet Shell:** Made of high-density polyethylene with smooth surfaces and reinforced ribs for added rigidity. Includes a central visor and a water rim for drainage.
- **Welding Face Shield:** Polyamide body with fiberglass, offering great resistance to combustion. The shield includes a rectangular cavity for an inactinic filter (available in sizes 110×55, 105×50, and 108×51) and a 1mm thick polycarbonate outer cover to protect the filter from impacts.
- **Inactinic Filter:** Standard filter tone is 12, with additional tones available to meet various welding requirements.
- **Harness:** Manufactured from high-impact polyethylene, the harness includes a headband, neckband, and six-point inner support system. The headband features a textile sweatband for comfort. The nape band is adjustable with a wheel mechanism for size fitting, and the height can be adjusted in three positions.
- **Adjustable and Comfortable:** Fully adjustable system for a perfect fit, ensuring comfort during extended use.
- **Weight:** 662 g
